BRUSHED NICKEL

CHROME

MATTE BLACK

GOLD

How to measure your shower enclosure for an accurate quote:

1. Measure from the ground up to the point where you want your glass (height) - we recommend going up to at least the bottom of the shower head, and always leaving at least 6" from the ceiling for ventilation.
2. Measure the wall to wall opening (width).

Photos shown are for reference only. Individual hardware styles may vary due to sizing and availability.
